CONTENTS

JANUARY

S. V. LEONTYEV and W. B. LYATSKY — 1 — Solitary auroral arc generation

S. M. KLOSKO and C. A. WAGNER — 5 — Spherical harmonic representation of the gravity field from dynamic satellite data

L. H. BRACE, R. F. THEIS and W. R. HOEGY — 29 — Plasma clouds above the ionopause of Venus and their implications

T. OGAWA — 39 — A new interpretation of the 1304 Å triplet airglow intensity ratio with the fine structure levels $O(^1P_J)$ in local thermodynamic equilibrium

S. S. C. WU, A. A. ELASSAL, R. JORDAN and F. J. SCHAFER — 45 — Photogrammetric application of Viking orbital photography

G. D. PARKER — 57 — Spectral properties of hydromagnetic fluctuations near 4 and 5 a.u.

P. C. SIMON, R. PASTIELS and D. NEVEJANS — 67 — Balloon observations of solar ultraviolet irradiance at solar minimum

H. HILLER — 73 — Lumped geopotential harmonics of order 29, from analysis of the orbit of Cosmos 837 rocket

R. LUNDIN and B. APARICIO — 81 — Observations of penetrated solar wind plasma elements in the plasma mantle

L. ROMANELLI and F. A. HIRSCH — 93 — The height integrated current density at the geomagnetic equator: analysis of its measurements

S. DUHAU, L. ROMANELLI and F. A. HIRSCH — 97 — Indication of anomalous conductivity at the Nigerian dip equator

F. ARNOLD and G. HENSCHEN — 101 — Positive ion composition measurements in the upper stratosphere—evidence for an unknown aerosol component

BOOK REVIEWS — 109

ERRATUM — 111

FEBRUARY

R. J. MORRIS, K. D. COLE, E. E. MATVEEVA and V. A. TROITSKAYA — 113 — Hydromagnetic "whistles" at the dayside cusps: IPRP events

K. D. COLE, R. J. MORRIS, E. T. MATVEEVA, V. A. TROITSKAYA and O. A. POKHOTELOV — 129 — The relationship of the boundary layer of the magnetosphere to IPRP events

J. E. FREDERICK and R. B. ABRAMS — 137 — Model studies of nitric oxide fluorescence in the earth's backscattered spectrum

J. W. CHAMBERLAIN — 147 — The influence of solar ultraviolet variability on climate

J. C. MCCONNELL, J. B. HOLBERG, G. R. SMITH, B. R. SANDEL, D. E. SHEMANSKY and A. L. BROADFOOT — 151 — A new look at the ionosphere of Jupiter in light of the UVS occultation results

C. GRANIER and G. MEGIE — 169 — Daytime lidar measurements of the mesospheric sodium layer

G. MARKLUND, I. SANDAHL and H. OPGENOORTH — 179 — A study of the dynamics of a discrete auroral ARC

VOL. 30 1982

K. YUMOTO and T. SAITO 199 Parametric excitation of Alfvén wave by magnetosonic wave with oblique propagation

H. RISHBETH and J. C. G. WALKER 209 Directional currents in nocturnal *E*-region layers

K.-R. KOCH and B. H. CHOVITZ 215 Comments on "Intercomparisons of earth models by means of lumped coefficients" by Klokočník and Pospíšilová

BOOK REVIEW 217

MARCH

G. V. GROVES 219 The vertical structure of atmospheric oscillations formulated by classical tidal theory

T. RAY 245 Kelvin–Helmholtz instabilities in cometary ion tails

P. C. WRAIGHT 251 Association of atomic oxygen and airglow excitation mechanisms

B. HULTQVIST, H. BORG, L.-Å. HOLMGREN, H. REME, A. BAHNSEN, M. JESPERSEN and G. KREMSER 261 Quiet-time convection electric field properties derived from keV electron measurements at the inner edge of the plasma sheet by means of GEOS-2

W. ALLAN and F. B. KNOX 285 ULF pulsation mode coupling in the ionosphere and magnetosphere

J. E. M. HAMILTON and J. W. EASTWOOD 293 The effect of a normal magnetic field component on current sheet stability

SHORT PAPER

D. A. GURNETT and N. D'ANGELO 307 The 22-year solar cycle: a heliospheric oscillation?

ERRATUM 313

APRIL

K. SCHLEGEL and J. P. ST-MAURICE 315 Note on the parallel propagation effects of unstable Farley–Buneman waves at high latitudes

S. ISMAIL and C.-I. MENG 319 A classification of polar cap auroral arcs

P. W. DALY and E. KEPPLER 331 Observation of a flux transfer event on the earthward side of the magnetopause

W. ALLAN 339 Phase variation of ULF pulsations along the geomagnetic field-line

S. B. LYAKHOV, A. D. MAIOROV, G. G. MANAGADZE, O. A. POVALYAEV, A. I. CHMIL, L. YU. KOCHMAREV, E. G. SHUSTIN, M. F. FRIEDRICH, W. K. RIEDLER, A. N. LALIASHVILI, A. KIRAGA, Z. KŁOSS, Z. KRAVCHIC and N. A. LEONOV 347 Laboratory studies for beam plasma discharge experiments with rockets

V. M. VASYLIUNAS, J. R. KAN, G. L. SISCOE and S.-I. AKASOFU 359 Scaling relations governing magnetospheric energy transfer

J. R. KAN and S.-I. AKASOFU 367 Dynamo process governing solar wind–magnetosphere energy coupling

R. J. PELLINEN, W. BAUMJOHANN, W. J. HEIKKILA, V. A. SERGEEV, A. G. YAHNIN, G. MARKLUND and A. O. MELNIKOV 371 Event study on pre-substorm phases and their relation to the energy coupling between solar wind and magnetosphere

S.-I. AKASOFU 389 Hall current as a source of the cross-tail current interruption, the asymmetric main phase field and the poleward expanding auroral bulge

P. CERRONI and G. MARTELLI 395 Magnification of pre-existing magnetic fields in impact-produced plasmas, with reference to impact craters

1982

D. JONES — 399 — Terrestrial myriametric radiation from the Earth's plasmapause

D. G. KING-HELE and D. M. C. WALKER — 411 — Geopotential harmonics of order 29, 30 and 31 from analysis of resonant orbits

SHORT PAPER

T. NYGRÉN — 427 — A method of full wave analysis with improved stability

BOOK REVIEW — 431

MAY

N. A. TSYGANENKO — 433 — Pitch-angle scattering of energetic particles in the current sheet of the magnetospheric tail and stationary distribution functions

R. R. MEIER and J.-S. LEE — 439 — An analysis of the OI 1304 A dayglow using a Monte Carlo resonant scattering model with partial frequency redistribution

D. L. ZIEGLER, J. H. NEWMAN, K. A. SMITH and R. F. STEBBINGS — 451 — Double ionization of atomic oxygen by electron impact

G. A. SCHMITT, V. J. ABREU and P. B. HAYS — 457 — Line shape of the non-thermal 6300 Å $O(^1D)$ emission

M. H. REES — 463 — On the interaction of auroral protons with the Earth's atmosphere

M. D. KARTALEV and I. P. MASTIKOV — 473 — Steady-state magnetic field in the magnetosheath

H. DE FERAUDY and B. HIGEL — 483 — Plasma boundaries at 6.6 R_E as observed by GEOS-2: large plasmapause discontinuity and injection event. Discussion of diamagnetic effects

V. FORMISANO, A. A. GALEEV and R. Z. SAGDEEV — 491 — The role of the critical ionization velocity phenomena in the production of inner coma cometary plasma

A. A. VIGGIANO, F. ARNOLD, D. W. FAHEY, F. C. FEHSENFELD and E. E. FERGUSON — 499 — Silicon negative ion chemistry in the atmosphere—*in situ* and laboratory measurements

V. V. AGASHE and S. M. RATHI — 507 — Changes in the concentration of mesospheric ozone during the total solar eclipse

P. G. RICHARDS, M. R. TORR and D. G. TORR — 515 — The seasonal effect of nitric oxide cooling on the thermospheric u.v. heat budget

S. R. PRABHAKARAN NAYAR and P. REVATHY — 519 — On the cause of geomagnetic activity at Hale sector boundary

BOOK REVIEWS — 523

JUNE

A. GRAFE — 525 — Estimated conductivity ratio Σ_H/Σ_P in the auroral electrojets in connection with electrojet width and field-aligned currents

S.-I. AKASOFU, J. F. CARBARY, C.-I. MENG, J. P. SULLIVAN and R. P. LEPPING — 537 — A high time resolution study of the solar wind–magnetosphere energy coupling function

J. F. NOXON — 545 — A global study of $O_2(^1\Delta_g)$ airglow: day and twilight

J. L. MCCRUMB — 559 — Reaction paths leading from O_2^+ to water clusters under cold mesospheric conditions

J. E. FREDERICK and R. B. ABRAMS	575	Dayglow emissions of the O_2 Herzberg bands and the Rayleigh backscattered spectrum of the earth
A. BHATTACHARYYA and G. S. LAKHINA	581	Short-wavelength drift dissipative instability in the presence of field-aligned currents
K.-K. TSCHU, J.-X. ZHANG and C.-F. LIU	587	Analysis of geomagnetic effect of previous 5 solar eclipses occurring in China during past 50 years
M. LOCKWOOD	595	Thermal ion flows in the topside auroral ionosphere and the effects of low-altitude, transverse acceleration
A. TARRAGO and M.-L. CHANIN	611	Interpretation in terms of gravity waves of structures observed at the mesopause level by photogrammetry and lidar
BOOK REVIEWS	617	
ERRATA	619	

JULY

Y. KAMIDE, S.-I. AKASOFU, B.-H. AHN, W. BAUMJOHANN and J. L. KISABETH	621	Total current of the auroral electrojet estimated from the IMS Alaska meridian chain of magnetic observatories
L. C. LEE, J. R. KAN and S.-I. AKASOFU	627	Ring current energy injection rate and solar wind–magnetosphere energy coupling
Y. I. FELDSTEIN, R. G. AFONINA, B. A. BELOV and A. E. LEVITIN	635	Magnetic field and field-aligned current variations in the polar cusp controlled by interplanetary medium parameters
S. MATSUSHITA and W.-Y. XU	641	Equivalent ionospheric current systems representing IMF sector effects on the polar geomagnetic field
M. P. GOUGH	657	Non-thermal continuum emissions associated with electron injections: remote plasmapause sounding
L. NAIGUO and T. KANG-KUN	669	A study of geomagnetic storms at Beijing in terms of solar wind
E. TRUSSONI, M. DOBROWOLNY and G. MASTRANTONIO	677	Kelvin–Helmholtz instability of the magnetopause boundary: comparison with observed fluctuations
C. VENUGOPAL and K. S. VISWANATHAN	687	Near perpendicular propagation of electromagnetic waves in the magnetosphere
K. HENRIKSEN and P. YA. SUKHOIVANENKO	695	The detection and interpretation of the orthohelium emission at 5876 Å in aurora
A. HRUSKA	701	Topology of magnetodynamic flows: kinetic and internal energy of a one-fluid plasma
Z.-J. WU and K. D. COLE	711	The ratio between magnetotail height and neutral point height
R. LUNDIN, B. HULTQVIST, E. DUBININ, A. ZACKAROV and N. PISSARENKO	715	Observations of outflowing ion beams on auroral field lines at altitudes of many earth radii

SHORT PAPERS

K. STAMNES	727	Reflection and transmission by a vertically inhomogenous planetary atmosphere
B. A. TINSLEY and S.-I. AKASOFU	733	A note on the lifetime of the ring current particles

SUBJECT INDEX

AIRGLOW

nitric oxide,
fluorescence in Earth's backscattered spectrum, 137
infra red emissions at night, model, 1043

oxygen,
excitation mechanisms from association schematics, 251
Herzberg bands, dayglow, detected in Rayleigh backscattered spectrum of Earth, 575
Herzberg bands, vibrational distribution of O_2 ($A^3\Sigma_u^+$) in nightglow, 1133
OI (5577), temporal variations at polar cap, 865
O_2 ($^1\Delta g$), day and twilight, global study, 545
1304Å dayglow, resonant scattering model, 439
1304Å triplet intensity ratio assuming LTE, 39

ATMOSPHERE, PLANETARY

escape mechanisms for terrestrial bodies, 773
evolution and origin, 741
evolution implications of atmosphere-surface interactions on Venus, 803
gas capture and rare gas retention by accreting planets, 765
primitive type, radiative-photochemical model, 785
regulation of CO_2 and climate; GAIA or geochemistry, 795

ATMOSPHERE, TERRESTRIAL

chemistry,
H_2O, H_2 and meteoritic ions in mesophere and lower thermosphere, 1117
radiative-photochemical model of primitive atmosphere, 785
recombination of small ions in troposphere and stratosphere, 1275
regulation of CO_2 and climate; GAIA or geochemistry, 795

climate,
influence of solar interactions, 147, 1079
regulation of CO_2; chemical relationships, 795

composition,
air density from space craft orbit analysis, 909
evidence for aerosol component in stratosphere, 101
nitric oxide fluorescence in backscattered spectrum, 137
ozone, mesospheric, changes during solar eclipse, 507
silicon negative ions in mesosphere, 499
sodium, mesospheric lidar measurements, 169

dynamics,
oscillations, vertical structure formulated by classical tidal theory, 219
oscillation and tidal characteristics in mesosphere and lower thermosphere, 1283
transport of aurorally produced $N(^2D)$ in high latitude thermosphere, 1091
winds, Fabry-Perot determinations, 1025
winds, thermospheric, high latitude $N(^2D)$ transport, 1091
winds, thermospheric; high latitude, particle precipitation, 1259

energetics,
cooling by NO, heat loss from thermosphere, 515
interaction with auroral protons, 463
radiation field in troposphere and stratosphere, 923, 935
thermospheric heating efficiency by magnetospheric electron precipitation, 1083

irradiation, solar u.v.,
at solar minimum, 67

influence of variability on climate, 147

temperatures, Fabry-Perot determinations, 1025

weather,
influence of solar radiation, 147, 1079
regulation of CO_2 and its chemistry, 795

AURORA

arc,
dynamics of, 179
polar cap, classification of, 319
solitary, generation of, 1

orthohelium emission at 5876Å, 695
proton precipitation, interaction with Earth's atmosphere, 463
transport of $N(^2D)$ by winds in high latitude thermosphere, 1091
zone locations and distances from magnetic and geographic equators, 1073

BEAMS

ions, outflowing on auroral field lines, 715
laboratory studies for experiments of beam plasma discharges from rockets, 347

BOOK REVIEWS

Cosmic Rays in the Heliosphere (J.J. Quenby), 523
Numerical Data and Functional Relationships in Science and Technology (S. Braddley), 1077
Observational Astronomy for Amateurs (J. Bradshaw), 617

Progress in Planetary Exploration (G. Hunt), 109
Relation between Laboratory and Space Plasmas (A.D. Johnstone), 523
Satellite Perturbations and Orbital Determinations: Advances in Space Research, Vol. 1, No. 6 (D.G. King-Hele), 217
Space Science Comes of Age-Perspectives in the History of the Space Sciences (L. Thomas), 109
Strategies for the Search for Life in the Universe (D.R. Bates), 1077
Water Vapour Parameters from Microwave to Medium Infrared (S. Braddley), 617

COMETS

inner coma plasma production, role of critical ionization velocity phenomenon, 491
Kelvin-Helmholtz instability in ion tails, 245

COSMIC RAYS

anisotropy in heliomagnetospheres, sidereal daily variation, 879

CURRENT SHEET

see MAGNETOSPHERE

CURRENT SYSTEMS

anomalous conductivity at Nigerian dip equator, 97
electrojet,
auroral, conductivity ratios in connection with electrojet width and field-aligned currents, 525
auroral, total current estimation from chain of magnetic observatories, 621
equatorial, height integrated current density, 93

field-aligned, in connection with,
conductivity ratios in auroral electrojets, 525
Hall currents, 389
magnetic disturbances in dayside polar region, 1033
polar cusp variations, 635
Radler effect in magnetotail plasma, 875
short-wavelength drift dissipative instabilities, 581

related to magnetospheric models constructed from satellite data, 985
resulting from IMF sector effects on the polar magnetic field, 641
ring current energy injections rate and solar wind - magnetosphere energy coupling, 627
ring currents, lifetime of particles, 733
see also IONOSPHERE AND MAGNETOSPHERE

GEOELECTRIC FIELD

properties derived from electron measurements at plasma sheet, 261
stratospheric, mid-latitude horizontal, during magnetically disturbed periods, 1013

GEOGRAVITATIONAL FIELD

harmonics, derived from spacecraft data, 5, 73, 411
intercomparisons of Earth models, 215

GEOMAGNETIC FIELD

activity at Hale sector boundary, 519
Alfvén wave, excitation by magnetosonic wave with oblique propagation, 199
equatorial variations, effect on conductivity and current density, 93, 97

geomagnetic indices, influence of solar interaction regions, 1079
IPRP events,
polar cusp variations, 113
relationship to boundary layer of magnetosphere, 129
long term effects of solar eclipses, 587
model, magnetospheric,
development from satellite data, 985
energetic particle losses and trapping, 999
neutral line motion due to solar flare-magnetospheric substorm coupling, 1183
normal component, effect on current sheet stability, 293
polar effects of the interplanetary magnetic field, 635, 641
pulsations,
data analysis technique, 1249
Pi 2, high latitude results, 1239
Pc 1-2, observations of heavy ion effects, 1229
resonance regions, study by ground magnetometers, 1199
ULF, coupling in ionosphere and magnetosphere, 285
ULF, phase variations, 399
storm,
in dayside polar region, 1033
pre-substorm phases, relation to solar wind-magnetosphere energy coupling, 371
study in terms of solar wind, 669
substorm onset, initial ionospheric conductivity, 1315
substorm phenomena, cross-tail current interruption, asymmetric mainphase field and poleward expanding auroral bulge, 389

HYDROMAGNETIC WAVES

see MAGNETOHYDRODYNAMICS

IMPACT CRATERING

adjacent magnetic field anomalies, 395

INJECTION EVENTS

at plasmapause, associated non-thermal continuum emission, 483, 657

INTERFEROMETRY

Fabry-Perot determination of F-region neutral winds and temperatures, 1025

INTERPLANETARY MAGNETIC FIELD

asymmetry of Saturn's magnetospheric tail region, 1061
effects on polar geomagnetic field, equivalent ionospheric current systems, 641
Hale sector boundary, cause of geomagnetic activity, 519
hydromagnetic fluctuations near 4 and 5 AU, spectral properties of, 57
parameters controlling magnetic field and field-aligned current variations in polar cusp, 635

Io

structure of torus, 855

IONS

auroral, velocity distribution, the Boltzmann model, 1137
auroral, outflowing on auroral field lines, 715
positive, D-region chemistry, 1065
positive, stratospheric aerosol component, 101
positive and negative, in lower ionosphere, 1295, 1307
silicon negative ion chemistry in mesosphere, 499
small, recombination in troposphere and stratosphere, 1275
sulphur, ionization by electron impact, 1269
thermal, flow characteristics in topside auroral ionosphere, 595
water clusters, reaction paths from O_2^+, 599

IONOSPHERE

auroral,
ion velocity distribution, 1137
outflowing ion beams on auroral field lines, 715
thermal ion flows and effects of low altitude transverse acceleration, 595

composition in lower region, positive and negative ions, 1295, 1307
conductivity, initial magnitude at substorm onset, 1315
D-region positive and negative ion chemistry, 1065
E-region, nocturnal, directional currents, 209
F-region, short wavelength drift waves and field-aligned currents, 581
neutral winds and temperatures, Fabry-Perot determinations, 1025

JUPITER

ionosphere, implications of UVS occultation results, 151

LIDAR

gravity waves at mesopause, 611
measurements of mesospheric sodium, 169

MAGNETOHYDRODYNAMICS

Alfvén waves,

VOL. 30 1982

excited by magnetosonic wave, 199
transmission through rotational discontinuity at magnetopause, 1127

coupling between ionosphere and magnetosphere, ULF pulsation mode, 285
dynamo process governing solar wind-magnetosphere energy coupling, 367, 371, 537
electromagnetic wave propagation in magnetosphere, 687
flow topology in a one-fluid plasma, 701
hydromagnetic waves, resonant, multi-satellite observations, 1209
Kelvin-Helmholtz instability of magnetopause, comparison with observed fluctuations, 677
wave-particle interactions in the ULF range, satellite results, 1219

MAGNETOMETERS

ground arrays in the study of pulsation resonance regions, 1199

MAGNETOSPHERE

boundary layer, relationship to IPRP events, 129
convection at low level power ϵ, 1057
coupling,
flux transfer event on earthward side of magnetopause, 331
interconnection of field lines in magnetosphere to magnetosheath, 331
parametric, magnetosonic waves excite Alfvén waves, 199
substorm-solar flare, neutral line motion, 1183
ULF pulsation mode, 285
energy coupling to solar wind,
dynamo process, 367
event study on pre-substorm phase, 371
high time resolution study, 537
ring current energy injection rate, 627
energy transfer, scaling relations, 359

magnetopause,
Kelvin-Helmholtz instability; comparison with observed fluctuations, 677
rotational discontinuity, transmission of Alfvén waves, 1127
shape, magnetotail-neutral point height ratio, 711
magnetosheath, steady stage magnetic field, 473
magnetotail, formation of plasma sheet, convection mechanism, 1007
models,
for particle loss and trapping boundaries, 999
from satellite data, 985
precipitation,
electron, and thermospheric heating, 1083
penetration of solar wind plasma elements, 81
pitch angle scattering of energetic particles in current sheet, 433
propation of e.m. waves perpendicular to magnetic field lines, 687
pulsations,
hydromagnetic whistles at dayside cusps; IPRP events, 113
magnetosonic waves - Alfvén waves, 199
ULF waves, 285

MARS

photogrammetric application of Viking orbital photography, 45
regolith-atmosphere exchange of H_2O and CO_2, effects on atmospheric history and climate, 819

MASS SPECTROMETRY

silicon negative ions in mesosphere, 499
stratospheric positive ion composition, aerosol component, 101

METEORITIC MATERIAL

chemistry of meteoritic ions in mesosphere, 1117

MATHEMATICAL TECHNIQUES

method of full wave analysis with improved stability, 427

NITRIC OXIDE

cooling effect on thermospheric u.v. heat budget, 515
fluorescence in Earth's backscattered spectrum, 137
infrared radiation in upper atmosphere, 1043

NOCTILUCENT CLOUDS

simulation of genesis, properties and global influences, 1147

OZONE

mesospheric, changes during solar eclipse, 507

PHOTOCHEMISTRY, OXYGEN

airflow excitation mechanism, 251
dayglow excitation of 1304Å emission, 439
O_2 ($A^3\Sigma_u^+$) vibrational distribution in nightglow, altitutde dependence, 1133

PHOTOGRAMMETRY

application of Viking orbital photography, 45
gravity waves at mesopause, 611

VOL
30
198

VOL.
30
1982

PLANETS

giant, formation of, 755

PLASMA

beam discharge experiments with rockets, 347
collisionless, Radler effect and currents in magnetotail, 875
cometary, inner coma, critical ionization velocity, 491
drift waves, short wavelength, in presence of field-aligned currents in F-region, 581
impact produced, magnification of pre-existing magnetic fields during hypervelocity impact events, 395
parallel propagation effects of Farley-Buneman waves, 315
topology of magnetodynamic flows, 701

PLASMAPAUSE

discontinuity and injection events observed by Geos-2, 483
measurement of terrestrial non-thermal continuum radiation gives profile of plasma density, 399
non-thermal continuum emission associated with electron injections, 657

PLASMA SHEET

electron (keV) measurements and convection electric field properties, 261
formation in magnetotail, convective mechanism, 1007

PRECIPITATION

electrons, thermospheric heating efficiency, 1083
particles, high latitude, consequences of global thermospheric dynamics, 1259
particles, in current sheet of magnetotail, pitch angle scattering, 433
protons, interaction with Earth's atmosphere, 463

RADIATIVE TRANSFER

NO cooling effect on thermospheric u.v. heat budget, 515
OI 1304Å dayglow, resonant scattering model, 439
radiation field in troposphere and stratosphere, 923, 935
reflection and transmission by a vertically inhomogeneous planetary atmosphere, 727
resonance-fluorescence in barium ion clouds, 897

RADIO EMISSIONS

non-thermal terrestrial continuum from injection events at plasmapause, 483, 657

REACTION KINETICS

association rates of atomic oxygen, airglow excitation mechanisms, 251
double ionization of atomic oxygen by electron impact, 451
ionization of sulphur atoms by electron impact, 1269
water cluster ion formation from O_2^+ in mesosphere, 559

RING CURRENT

see CURRENT SYSTEMS

SATURN

eddy mixing coefficients, 849
magnetosphere, asymmetry of tail region and IMF, 1061

SEEDING

barium ion clouds, resonance-fluorescence, 897

SODIUM

mesospheric, from daytime lidar measurements, 169

SPACECRAFT

ATS-6, synchronous, Pc 1-2 heavy ion observations, 1229
GEOS 2, electric field properties at plasma sheet, 261
GEOS 2, plasmapause discontinuity and injection event, 483, 657
GEOS 1 and 2, wave-particle ULF interactions, 1219
hydromagnetic wave observations, 1209
IMP and HEOS, determination of magnetospheric current parameters, 985
orbital analysis, determination of atmospheric parameters, 5, 73, 411, 909

SPECTROSCOPY

atomic oxygen associations and airglow excitation mechanisms, 251
barium-ion cloud resonance-fluorescence, 897
line shape of non-thermal 6300Å $O(^1D)$ emission, 457
$O(^3P_\tau)$ fine structure levels in LTE, 39
O_2 $(A^3\Sigma_u^+)$ vibrational distribution in terrestrial nightglow, 1133

SULPHUR

ionization, single and multiple, by electron impact, 1269

SUN

solar cycle, 22 year, a heliospheric oscillation, 307
solar eclipses, long term geomagnetic effect, 587
solar flare - magnetospheric substorm coupling, 1183
solar interaction regions, influence on geomagnetic indices and troposphere, 1079
solar u.v.irradiance at solar minimum, balloon observations, 67
solar wind,
and geomagnetic storms, 669
magnetosphere energy coupling, 367, 371, 537, 627, 1007
penetration into plasma mantle, 81

TITAN, ATMOSPHERE

chemistry and evolution, 839
composition and origin, 833

VENUS

atmosphere-surface interactions, 803
ionopause, observations of energetic ions, 1107
plasma clouds above the ionopause and their implications, 29

WATER CLUSTERS

reaction paths leading from O^+ to water clusters under cold mesospheric conditions, 55

WAVES

drift, in auroral F-region in presence of field-aligned currents, 581
gravity, at mesopause, by photogrammetry and lidar, 611
hydromagnetic, see MAGNETOHYDRODYNAMICS
method of full wave analysis with improved stability, 427
wave-particle interactions in ULF range, 1219

WINDS

see ATMOSPHERE, TERRESTRIAL
